F r o m O u r P r e s i d e n t

I suppose, for those of us who are a little older, the fact that another year has gone by may not be the best news to receive. So, we make the best of the worst and take stock in the positives that lay ahead. If I were a New Year's resolution kind of guy, I would focus on becoming a better turner than I am now; creating several beautiful pieces never done before, or maybe finding a market to relieve the turned collection developing in every corner, on every shelf and in every cupboard throughout the house. At least my spouse would appreciate that. While I have a personal commitment to replace some of the older pieces and actually completed the first one this month, it's not a "resolution". So, I'll focus my attention on the coming year.

We have been talking about a membership survey to give everyone a voice in what we do or how we do it; to identify areas for improvement giving everyone greater benefit from membership; perhaps become little more creative and expand our current comfort zone into a bigger and better one. The survey is ready.

Then there are the challenges never done before. Challenges like balls and spheres, lidded boxes, textured platters and multi-axis turning. Add a few associated workshops and demos and some of us will probably branch into a new area by year end.

There seemed to have been strong support for participation in the 2016 Virginia State Fair when it was mentioned a few months ago. After all, it's right in our back yard. Maybe this year we can give the community a wake-up call as to who we are and what we do! Demos at the Fair, anyone?

Of course there are the turning competition in late April and Forestry camp in mid June, but this isn't nearly enough. We need to hunt for other organizations or functions in the community who can benefit from our support similar to what we have discussed with Dawn Flores and the tops program. If we each give a little it becomes a whole lot. I suspect (hopefully) some of our members may already have a few suggestions or ideas.

Collectively we are a very talented group and if we pooled our skills together into one or two specific turning projects we would certainly impress ourselves. It could even become an advertisement for new membership. After all, increased membership introduces more talent which creates new ideas and expands skill. It just gets better and better.

We have a great deal to look forward to in 2016 and will have a good year ahead. Now all we need is your continued support, contribution, ideas and suggestions.

By the way, if you haven't paid your annual dues yet, it would certainly help if you did.

Happy New Year and happy turning.

Ray

Richmond Penturners – January 2016 Meeting

Richmond Penturners had one of their best attended meetings this month as we all participated in making an aluminum click pen. A "kit" was supplied for \$10 which included a Schmidt ball bearing click mechanism, an aluminum tube, a refill, a spring, a clip and some material to make a nib.

The first step involved taping one end of the tube on the lathe by hand so the click mechanism could thread in. We had 2 lathes set up; one with a conventional collet chuck to hold the tube and the other with a homemade wooden collet held in a standard Nova chuck. With the tap secured in a drill chuck in a loose tail stock, the lathe is turned by hand while gently pushing on the drill chuck as the threads are cut.

After everyone tapped, there was a short demo on how to turn the nib end and finishing options for the aluminum tube. Matte or mirror, painting, decals, etc. are all possibilities. Several alternative designs using this technique were also presented. Wood or plastic could be substituted for the aluminum and if desired, the aluminum could even be used as a supporting tube for a fatter pen. Hope to see some of the finished products at our next meeting.

For our March meeting, we are planning to have a fishing rod maker demo how to wrap or weave colored thread onto pen tubes for some real exciting possibilities. There are some exquisite designs, now common to the fishing rod community that could translate well onto pens.

Richmond Penturners meet on the second Tuesday of odd numbered months.

March Challenge

(Spheres)

February's meeting we will have a workshop on how to turn a sphere

We are once again turning tops for 2016. Not only are these fun to turn, but they really improve your tool control. Have fun everybody!

QUARTERLY
CHALLENGE**

The Challenge will now be regularly scheduled for the third month of each quarter (March, June, September, and December) with the subject announced at the beginning of each quarter and included in the newsletter. Entries will be placed on a table separate from the Show-n-Tell. Members attending the meeting that evening will select the Challenge winner by popular vote. Voting will be accomplished by placing a token (provided on the table) in the cup (also provided) for the entry of your choice. The winner will have the opportunity to speak about the piece, how it was made, type of wood, any special processes or finishes used, etc. It's a change to have a little fun and get everyone involved one way or another.
